work in China —
so much to do,
 Training of archeol-

China — potential-
ogists probably
broader. Our first
step should be
specialists like
Oden — + maybe
Australian geologists —
to work on specific
projects of inter-
national scope. Maybe
they could teach Chinese
to interest in inter-
national correlation

The situation... like it's
been very different
from what I've
been used to. There's all the
politics involved, and it's
taken quite a bit of
adaptation. It's been
interesting to talk to all
different political groups
and find out where they
stand. I've had to
adjust my thinking quite
a bit. I've learned a
lot about being
unsuccessful. 

The key is to be
realistic and
understand that
success doesn't
always come easy.
Come down Tuesday will be 1982 election.
